CAREER OBJECTIVE

Result-driven Network Engineer with hands-on experience in IP addressing & subnetting, DHCP/DNS services, MikroTik and Cisco router configuration, managed switch administration, VLAN segmentation, and network/port-level security including data encryption. Skilled in automating network operations using Python and applying AI-based tools for configuration planning, troubleshooting, and documentation. Seeking to contribute to a growth-oriented ISP or enterprise network team by building secure, stable, and efficient network infrastructure.

WORK EXPERIENCE

Fu Info Tech Ltd. — Network Executive

Dhaka, Nikunjo | May 2024 – Present

IP Addressing, DHCP & DNS

- Planned and implemented IP subnetting schemes (VLSM/CIDR) for office LAN segments to optimize address utilization and simplify routing.
- Configured and managed DHCP services on MikroTik routers — address pools, lease management, static bindings, and option configuration for connected devices.
- Set up and maintained DNS configuration (forwarding, local DNS records, and name resolution) for internal network clients.

MikroTik & Cisco Routing

- Configured and managed MikroTik routers — static & dynamic routing, NAT, Firewall rules, GRE Tunnels, Site-to-Site VPN, bandwidth management, and scheduled automation scripts.
- Configured and troubleshooted Cisco routers (basic to intermediate level) — interface configuration, static routing, and access lists, applying CCNA-level concepts in live environments.
- Designed and maintained LAN/WAN infrastructure across multiple office locations, ensuring stable connectivity and uptime.

Switching, VLAN & Port Security

- Configured and administered Managed Switches — VLAN creation & trunking, STP/RSTP loop prevention, and inter-VLAN routing for network segmentation.
- Implemented port security on access switches — MAC address limiting/binding, disabling unused ports, and restricting unauthorized device access to the network.
- Troubleshooted switch-level issues including VLAN misconfiguration, trunk failures, broadcast loops, and port-level connectivity faults.

Network & Data Security

- Applied router and firewall-level security policies — access control lists, NAT/port filtering, and VPN encryption (IPSec/GRE) to protect data in transit.
- Hardened MikroTik/Cisco device access using strong authentication, restricted management access, and secure remote-access configuration.
- Followed data encryption best practices for site-to-site VPN tunnels and remote connectivity to safeguard sensitive network traffic.

Python Automation & AI-Based Network Work

- Developed Python scripts for router configuration backup, scheduled device restarts, and network health checks, reducing manual administration time.
- Used AI tools (ChatGPT, Claude, Gemini) for network topology planning, configuration troubleshooting, and generating technical documentation.
- Applied AI-assisted analysis to speed up diagnosis of routing, VLAN, and connectivity issues, improving resolution time.

★SURVEILLANCE & SECURITY SYSTEMS — IP CAMERA | NVR | DVR | ACCESS CONTROL

- IP Camera, NVR & DVR Setup — Installed, configured, and maintained IP Camera, NVR, and DVR systems, including remote access setup, storage allocation, and recording schedule configuration.
- AI-Based Camera Configuration — Configured AI analytics features on IP cameras and NVR systems, including Human/Motion Detection, People Counting, and Vehicle Tracking for intelligent surveillance monitoring.
- NVR AI-Based Playback Search — Used AI-powered playback search in NVR systems to quickly locate specific recorded events and objects, reducing footage review time.
- Automated HDD Health Reporting (Gmail) — Configured automatic HDD health monitoring with scheduled Gmail email reports for proactive maintenance and early fault detection.
- Automated Playback-Stop Alerts (Gmail) — Set up automatic Gmail notification reporting triggered when NVR/DVR playback or recording stops, enabling fast detection of and response to system faults.
- Access Control Systems — Installed and managed door controllers, card readers, and biometric access devices integrated with the network infrastructure.

TECHNICAL SKILLS

Networking Fundamentals

- IP Addressing & Subnetting — VLSM, CIDR, Subnet Planning
- DHCP — Pool/Lease Management, Static Bindings, Option Configuration
- DNS — Forwarding, Local Records, Name Resolution Troubleshooting
- LAN/WAN — Design, Setup, Monitoring, Troubleshooting

Routing — MikroTik & Cisco / CCNA

- MikroTik RouterOS — Routing, NAT, Firewall, GRE Tunnel, Site-to-Site VPN, Bandwidth Management, Scripting
- Cisco Router (CCNA Concepts) — Interface Configuration, Static & Dynamic Routing, ACLs

Switching & VLAN Security

- Managed Switch Administration — VLAN, Trunking, STP/RSTP
- Port Security — MAC Limiting/Binding, Unused Port Lockdown
- Switch & Loop Troubleshooting — VLAN Misconfig, Trunk & Connectivity Issues

Network Security & Encryption

- Router & Firewall Security — ACLs, NAT/Port Filtering
- VPN & Data Encryption — IPSec/GRE Site-to-Site Tunnels
- Device Hardening — Secure Remote Access, Authentication Policies

Automation & AI Tools

- Python Automation — Config Backup, Scheduled Restarts, Network Health Scripts
- AI-Assisted Network Work — ChatGPT, Claude, Gemini for Troubleshooting, Planning & Documentation
- MS Office — Word, Excel, PowerPoint

Surveillance & AI-Based Camera Systems

- IP Camera / NVR / DVR — Installation, Configuration, Remote Access, Storage & Recording Setup
- AI Camera Analytics — Human/Motion Detection, People Counting, Vehicle Tracking, Facial Recognition
- NVR AI Playback Search — Fast Event & Object-Based Footage Retrieval
- Automated Reporting — HDD Health & Playback-Stop Alerts via Gmail (Python Scripting)
- Access Control — Door Controller, Card Reader, Biometric Device Setup

EDUCATIONAL QUALIFICATION

Diploma in Engineering — Computer

Center For Technology Transfer (CTT), BTEB | Passing Year: 2023 | GPA: 3.76 / 4.00

Secondary School Certificate (SSC) — Business

Tumilia Boys' High School, Dhaka Board | Passing Year: 2019 | GPA: 3.61 / 5.00

CERTIFICATIONS & TRAINING

- MikroTik RouterOS — Certified (Practical Experience)
- Cisco CCNA — Knowledge & Hands-on Lab Practice (Certification in Progress)
- AI Tools Proficiency — ChatGPT, Claude, Gemini (Self-trained, Actively Used for Network Work)

EXTRA-CURRICULAR ACTIVITIES

- Home-lab practice — MikroTik & Cisco router/switch configuration, VLAN and port security testing.
- Self-learning IP subnetting, DHCP/DNS design, and Python automation for networking tasks.
- Using AI tools daily for network planning, troubleshooting, and technical documentation.

LANGUAGE PROFICIENCY

- Bengali — Native
- English — Intermediate (Reading, Writing, Communication)

PERSONAL INFORMATION

Full Name: Junaid Bhuiyan	Father's Name: Faruk Bhuiyan
Mother's Name: Shur Akter	Date of Birth: 03 January 2003
Gender: Male	Blood Group: B+ (ve)
Religion: Islam	Marital Status: Unmarried
Nationality: Bangladeshi (By Birth)	NID No.: 6910359303
Address: Vill-Tumilia, P.O-Kaligonj-1720, Gazipur, Dhaka	

DECLARATION

I hereby declare that all information provided above is true and correct to the best of my knowledge and belief.

Junaid Bhuiyan
